KeyMacro creates and saves macro commands for use on Windows, Mac OS, Android and iOS systems. The platform is all in one, so you can create or edit your commands right from the application. From custom keyboard shortcuts, to recording system processes, KeyMacro has you covered. Works on ALL PCs with Windows OS and MAC KeyMacro works on all Windows and Mac OS computers regardless of the OS version. That means you can save macros for any computer running the latest Windows and MAC OS, and any prior version. Commands can be assigned to any of your programs or windows. KeyMacro is not limited to just keyboard shortcuts. You can assign any command you want to do anything you want to do. KeyMacro can record your keystrokes and system processes to use as macros. Custom KeyCombs KeyMacro also allows you to add key combos for your desired program or window. There are built in Shortcut Combos and Custom Combos. In Windows it is saved to the file as a *.EXE file and in Mac OS it is saved as a *.app file. Features: Multilingual: Multilingual support available for the following languages: English, French, Italian, German, Portuguese, Spanish, Dutch, Russian, Polish, Hungarian, Czech, Slovak, Danish, Finnish, Norwegian, Swedish, Finnish, Estonian, Hungarian, Slovak, Czech, Slovenian, Lithuanian, Latvian, and Romanian.
