The macro enables you to get the MAC address of the Local Area Network card on your computer. Description of the Need for this Macro: This macro can help the helpdesk when troubleshooting network problems. The helpdesk can see the IP of the user when a user logs into the computer as well as a list of connected network hardware devices (modems, routers, etc) on the network that have a MAC address. This helps the helpdesk to identify and troubleshoot problems that are related to the network. Comments on Requirement: This macro only needs to be placed in the MACROS collection in the Configuration menu. References: None. NAUDIO NAUDIO Description: NAUDIO is a tool designed to help non-technical people determine whether or not they have the right audio drivers on their system. KEYMACRO Description: This macro enables you to check the status of the sound card on your computer. Description of the Need for this Macro: This macro can help those who do not understand the technical jargon that is found on the sound card and setting check page. A person may see a red flag telling them that their audio drivers are not installed. Comments on Requirement: This macro only needs to be placed in the MACROS collection in the Configuration menu. References: None. NAVTELL NAVTELL Description: NAVTELL is a file browser that allows users to navigate their computers directly to their network shares without typing a path. KEYMACRO Description: This macro allows you to open a folder in the NAVTELL program directly from Windows Explorer. Description of the Need for this Macro: This macro can allow a user to navigate to a specific folder in the ComputerName folder of their NETWARE system. Comments on Requirement: NAVTELL is a must for all NETWARE systems running Windows 95 or higher. References: See the NAVTELL Program in the Downloads page. NBT NBT Description: NBT is a freeware Windows utility that installs itself with your default configuration files. KEYMACRO Description: This macro allows you to test whether or not a computer is running NetBIOS. Description of the Need for this Macro: This macro will help you troubleshoot a problem related to NetBIOS. Comments on Requirement: This macro only needs <http://www.agoage4.com/newspaper/component/kide>
