Using DraftSight, you can incorporate feedback into your designs by marking up drawings or your clipboard, sending the feedback to AutoCAD, and then viewing the combined result in a live drawing session. It's easier than ever to incorporate feedback and make your designs better. Design Compatibility: With new Design Compatibility Technology, you can choose to use different device to edit your drawings — like a laptop, iPad, or touchscreen. The new Technology enables you to edit drawings with any drawing application on any device. There are new features such as Design Compatibility, Camera Grab and Panorama View. With Design Compatibility you can choose to edit a drawing from either a mouse or touchpoint. Using the Camera Grab tool, you can now select a portion of your screen to quickly take a picture of for later editing. The new Panorama View tool lets you choose to display several drawings in one place. Also new is the ability to use the command line in AutoCAD. It is faster than AutoCAD LT because it doesn't include the legacy components of AutoCAD LT, such as stereo measurement and block structures. Windows Apps: Edit with Touch You can now edit a drawing directly with the new touchpoint tool, without having to use the mouse. Using the touchpoint tool, you can drag your finger to select objects or areas and, using the pen, can edit your drawing. This tool is only available on Windows 10. Intuitive
