CAD/CAM standards such as IFC, IGES, STEP, Parasolid and others Limitations In AutoCAD, certain tasks require additional hardware and software to run, such as 3D graphics capabilities, Autodesk Exchange Apps (AX Apps), or the AutoCAD Drafting Disc (DD). Using other applications If Autodesk wants to use other applications besides AutoCAD, such as 3D Studio Max, Bridge, Maya, After Effects, Painter, Photoshop, or even a.NET application to update the drawings within the AutoCAD software itself, the functionality can be activated using a plug-in for AutoCAD called "Dynamic Link". For more information, see the Autodesk Dynamic Link page. Open Database Connectivity (ODBC) Users can use the ODBC command to link to any database other than MS Access. The ODBC command is used to connect to a PostgreSQL database. ODBC for AutoCAD is the same as ODBC for Microsoft Access. It allows users to view or update AutoCAD drawings in other databases, for example, AECOM's CADDoc or the product design system, Pro/ENGINEER. Access Data Repository (ADR) AutoCAD has been connected to the Access Data Repository (ADR) since AutoCAD 2007. With this integration the functionality of the application is no longer limited to databases created by Autodesk.
