On a computer running Microsoft Windows non-core edition, run slui.exe [SOLUTION] Generate a new product key and re-activate the system. Log in and re-enter the valid product key. Jun 18, 2019. this problem were pop up when i want to change the product key. The full problem is 'error 0xc004e016 on a computer running microsoft windows non-core edition. RESOLUTION: After some investigation, I found out that the slmgr.vbs was missing an important parameter. When the parameter is missing, it is interpreted as a command line option. I solved the problem by adding the parameter /lpn to slmgr.vbs. I opened command prompt from the start menu and typed slmgr.vbs /lpn 0xc004f069 /upk 0xc004f069. slmgr.vbs started and finished without any errors. Issue: - I need to know which was the default product key before I added my product key. I could not find this in any registry or in any text files. So I used Wikipedia for the answer. Q: - Can you help me to do the same?. 1) I need to replace/add a product key in Windows registry. Registry example(Sample)
