What's New In AutoCAD?

AutoCAD team is introducing Markup Import and Markup Assist, new concepts that extend the suite of drawing tools for annotating and commenting on designs. In addition to its powerful text annotation features, AutoCAD 2023 introduces the ability to import comments from paper and PDF drawings, and then incorporate them into your drawings while in Drafting or Drawing view. It's a great way to exchange comments between colleagues or colleagues and customers. Markup Import and Markup Assist also incorporates information from the 3D environment, such as Revit files, and 3D models you import or create. The 3D features are especially useful when annotating or commenting on multidimensional projects. *See "Markup Assist with AutoCAD 2023," "Markup Import," and "AutoCAD 2023" in this article.
