The graphical user interface (GUI) has been improved to be more flexible and responsive. The new 2015 “2D” implementation is a major change from the previous 2015 “3D” implementation and comes with a new “2D” workspaces interface. The AutoCAD 2016 new user experience is similar to that of the AutoCAD 2015 user experience. The 2016 interface is very similar to the user interface of AutoCAD 2017, and some objects, like the tools, have been transferred to the new interface.
