The new system unlocks an entirely new generation of gameplay, allowing players to more easily and naturally perform distinct movement patterns such as sprints and jogs, create running and passing chemistry within a squad, and more. The introduction of this technology, and a new 'skills boost' mode, will deliver a more natural, responsive and entertaining football experience with one key objective in mind: make FIFA the only football game that everyone can play. **PLAYERS BEHAVE DIFFERENTLY!** All the amazing animations and real-world player traits are back in FIFA 22 as well, such as responsive, top-down passing, running through challenges, flicks off the chest, feints, and propping yourself up off the grass in the air. Technology has improved and evolved football simulation gameplay beyond the point of recognition. **SAVE THE BALL, GET DISCIPLINED!** As we move forward into a new era of football simulation, we've chosen the more traditional approach to improve the FIFA Skills Trainer system. Changes to the 'Save the Ball' mechanics include the new 'Stop the Action' and 'Slip the Ball' controls. This new generation of Save the Ball mechanics will provide more of a simulation experience by enabling players to play through the entire training mode for both sides of the game. **LOOSE KICKS, CLEAN KICKS & ALL OF THE ACTION!** Players now have greater control over loose kicks, which leads to tighter control of the ball in possession and more realistic goal-scoring opportunities. Players have more control when competing for aerial duels while using the Offside Penalties system, and have the ability to launch a new wave of stoppage time if they are whistled for an offense. In addition, defenders will feel the impact and weight of higher hits on the ball as they sprint towards the ball, making tackles exciting and realistic. **NEW GAMECHANGES AND GAME MODES IN FIFA 22!** In addition to all these updates, FIFA 22 includes the following additions and changes: · Team Styles Team Styles will now have a significant impact on player traits, tactics and more. · Unifying Playing Styles Now, the player's playing style can be displayed on his profile, in the Match Engine and the Skill Trainer. · Defensive Vantage

What's new in Fifa 22:

- **TOUSBALLS:** You can now score a goal off a free kick once per game.
- **ZONBOARD:** You will be hit harder from headers and balls received from heading.
- **TACTICS:** Your basic tactics (press together one way in the match), is now called “tactics (attack together)”.
- **SIX NEEDS:** Increase your chances of scoring: keep the ball longer and out pace the opposing team, dribble, use GK to counterattack, ghost in for a quick free kick or chip, use LFB to clear defenders, and either shoot for the back post or hand it off to an attacker before a defence reacts.
- **NO NEED TO HEAD TO A CHAMBER:** With **DEFENDER COUNTING NEXT**, you won't have to head to a defensive shell to clear defenders off the ball. Double press to stop a counter. And you can return via a reverse pass.
- **FIRST TIME ONLINE GAME:** Chelsea vs Wolves.
- **CHOOSE YOUR ATTACKER:** Over their career, 3 attackers step up their game in one of their 4 attacking positions. Balotelli-Fighting, Kane-Super sub, Bale-Off poacher, and Bendtner-Finisher.
- **SAVE TIME ON GK CHANGES:** Your GK is active for the entire match, but you only have to select the GK you want from your kit.
- **THROW YOUR BOWL EVERY 10 MINUTE:** Your throw-in is active for the rest of

-
- the match. Elite Throw-ins are still under IMPACT and can be interrupted.**
- **DON'T LOOK AHEAD! PLAY NOW**
GUARD: When the ball comes to you in an oddball location, treat it as an oddball event. Flick it, whack it, or jump on it. You'll find that many habits you built in previous FIFA live on in new ways.
